Raketu Launches Lite Version of VoIP Desktop Application

Raketu releases Raketu Lite, the light version of the company's VoIP calling desktop application. Raketu Lite can be downloaded directly from www.Raketu.com, was developed specifically for those consumers interested solely in Raketu's leading edge VoIP calling features, including Global IM/SMS and email capabilities. The new application's "Slim" interface is Raketu's Lite version of Raketu's full-featured LaunchPad Desktop application, which also integrates IPTV streamed video and VOD entertainment content.

Technical Details

Raketu Lite is a downloadable software application for consumer Windows and Vista operating system users, which offers free and extremely low cost VoIP calling from a desktop PC. Available immediately via www.Raketu.com, Raketu Lite supports users with free anytime PC-to-PC calling globally, and for Raketu prepaid customers, 1200 minutes per month of free PC-to-Phone calling or 600 minutes per month free Phone-to-Phone calling to free calling zones in 42 countries that include China, Japan, Australia, United Kingdom, France, Germany, Spain, Greece, Norway, Sweden, Switzerland, Mexico, Brazil, and the United States/Canada among others.
