Raketu Debuts VoIP Service Offering for Mobile Business Users

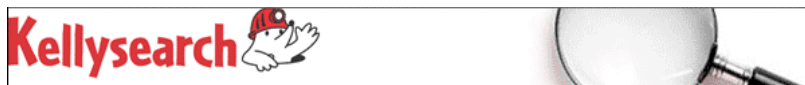

(Product News, 9 Jan 2008)

Raketu introduces its voice over Internet protocol (VoIP) calling web application optimized for the BlackBerry. The new web-based application allows business users of the BlackBerry Curve, BlackBerry 8800 Series, and BlackBerry Pearl to make international calls totally free or at Raketu's ultra-low cost VoIP calling rates. Additionally, business users can send SMS Text Messages globally, and send email all from within the Raketu BlackBerry Application.

"With over twelve million users of the BlackBerry worldwide, the introduction of our Raketu BlackBerry Application marks our definitive entry into the mobile business market," said Greg Parker, President and CEO of Raketu. "For businesses whose employees initiate a significant number of international calls from their BlackBerry mobile devices, Raketu's BlackBerry Application is a great way to reduce monthly calling costs."

Raketu's new BlackBerry Application is entirely web-based and does not require consumers to download any software. BlackBerry users can sign up and access the service via their BlackBerry web browser at <http://BlackBerry.raketu.com>. Using Raketu's BlackBerry application, users can call Internationally for free or at Raketu's ultra-low cost VoIP calling rates.
