## Raketu offers VoIP to BlackBerry

January 10, 2008 | Posted at 8:25 am by [Simon Sage](#) in [Announcements](#), [News](#) | [Comments \[0\]](#)

[Raketu](#) is [busting out](#) some cheap international calling rates through a browser-based application for BlackBerry. To see just how cheap we're talking, check out their [rates page](#) and see what you can get for your area - I know I was pretty happy with the results. Outside of that, Raketu also offers this cool social networking/TV thing called [Raketu TV](#). As for their new voice over IP calling service, head on over to [blackberry.raketu.com](#) on your mobile browser to sign up.
