Raketu Lite, Lean and Slim Raketu Desktop Released By Raketu

SnapVoIP

Raketu Communications has released Raketu Lite, the light version of Raketu Windows desktop application. Raketu Lite offers Raketu's VoIP Calling Features New "Slim" Interface Which Integrates VoIP Calling, IM/SMS, and Email in Easy-to-Use Desktop Application. If you are interested it could be downloaded directly from www.Raketu.com. The new application's "Slim" interface is

Raketu's Lite version of Raketu's full-featured LaunchPad Desktop application, which carry IPTV streamed video and VOD entertainment content in addition to Lite's features.

Raketu Lite is available for Windows XP and Vista users, and offers free and/or extremely low cost VoIP calling from a desktop PC. Raketu Lite supports users with free anytime PC-to-PC calling globally, and for Raketu prepaid customers, 1200 minutes per month of free PC-to-Phone calling or 600 minutes per month free Phone-to-Phone calling to free calling zones in 42 countries that include China, Japan, Australia, United Kingdom, France, Germany, Spain, Greece, Norway, Sweden, Switzerland, Mexico, Brazil, and the United States/Canada among others.

Mac users and users of other Operating Systems can make calls using Raketu's website i.e using RakWeb. RakWeb is very user-friendly. As long as you can access webpages you can use RakWeb. No download required.

All Raketu Versions, including Raketu Lite could be downloaded from www.raketu.com.
