Today i am going to jot down my TOP 5 VOIP providers for making FREE international calls. The list is purely prepared by me based on my personal experience and its not influenced by any [service provider](#).

1) VOIPcheap - This is the original VOIPcheap and not the UK version of this company. Although VOIPbuster, voipcheap.co.uk uses the same software, i found this software more reliable and voice quality is of high level. This is an straight winner when it comes to making FREE calls worldwide. You can virtually call more than 50 countries on normal PSTN landlines and mobiles in singapore, USA, HK & Canada. With some hacks, you can call from countries which are not listed in FREE list but you have a work around. Check my earlier post for that hack.

Benefits: Clear voice, You can make calls from your [PC](#). No need to buy any credits from them before making free calls. Allows PC or Phone to intiate call (via Directdial)

Drawbacks: really none.

2) Jajah: I tried jajah about 1 month back and with their FREE minutes i made calls to India. The difference between jajah and other VOIP providers is Jajah only allows you to make calls from your phone. That means You need to give your phone number and your calling party number before you can make a call. When you intiate a call Jajah first connect your phone. You pick up the call and then jajah connects to the other party.

Benefits: No [software download](#) needed. Just visit their site. No credits needed for free calls.

Drawbacks: Have to use a legitimate number before calling. Cant use PC to make call.

3) Gizmo : Popularly known as " Skype Killer". This [software](#) lets you call

anyone in more than 60 countries. The only downside is that you and other party both should be registered with Gizmo and should also register your numbers. I am sure that this project will be successful and in short time the daatabase of people will be built and then its a [FREE calling](#) world.

Benefits: Making calls is easier than ever, Killer Application interface,
Drawbacks: Requires both parties to register their numbers with Gizmo.

4) Raketu- Pretty decent service which offers FREE calls to 42 countries. I am rating it higher than VOIPbuster/Discount for the very reason thats its not a clone and it uses a diff [technology](#) than skype. Skype uses Supernodes which can be vulnerable to hacking. I covered that issues in my blog earlier. Additionally it integrates with Yahoo, [MSN messengers](#) etc.

Benefits: Better technology, Clear Voice, 42 countries FREE, Integrate with other messengers
Drawbcks- Haven't found any yet.

5) VOIPBuster/VOIPDiscount: Both these companies are a total rip-off from VOIPcheap. even their softwares are identical and i wonder they are all one company with different websites and company name. But sorry to say they suck at the voice quality. They offer the same service as VOIPcheap.

Benefits:1 or more additional countries (Thailand + mobile) on Voipdiscount.
Drawbacks: Low voice quality

Please drop your comments about the list. If you agree/dont agree, please let me know. If you have your TOP5 please let us know.
