[Raketu SMS & Review](#)

by [Todd](#)

Have you ever wanted a form of communication that has the same speed and potential as a rocket? Being that the Internet has become one of the most used [forms of communication](#) on Earth. There are many [products and services](#) that are offered on the Internet that can be accessed from computers or many mobile phones with Internet capability. One of the many communication products that is offered on the Internet is a company whose name comes from the *Czech word* [Raketu](#), which means rocket. [Raketu](#) is the place where communication meets media and people simply by using this application.

[Raketu](#) has many products that are available to computer and mobile phone users. You can save money by using Raketu's services that consists of [international calling](#), IM with any network, IP TV, feeds and more. Raketu products are fully synchronized and can be accessed from any mobile, website, download, WiFi, dial up or broadband network. There are no security risks when using this communication application and has been compared to [Skype](#) whose network can be vulnerable to security breaches. Raketu has unbeatable prices that some products and services start at \$9.95 for unlimited calling, which is unbeatable anywhere. Not only does this company offer products for computers but also for [smart phones](#), voicemail service, conference calling, sms text messaging and much more. This service accepts many currencies and service is available in many countries around the world, which makes Raketu a leader in global communication.

RakSMS Call (Phone-to-Phone using sms-text messaging)

Where to send SMS to initiate Raketu call: [click here](#)

Think of a situation when you don't have a computer or internet connection, and you want to make a international call using Raketu's low rates. All you have is a phone, which allows you to send an SMS. RakSMS calling feature will allow you to make this call. All you need to do is send an SMS in the required format to assigned number and we will connect the call for you.

How to make a phone-to-phone call using sms-text messaging:

One-time Set up:

1. The user must have an active Raketu account, with RakID and a pre-paid balance.
2. Enter a PIN NUMBER (PIN is NOT your password), which is 4 digits in length and may be entered by logging into the Raketu.com website, going to the "Your Profile" page, and near the bottom you will find the entry for the PIN NUMBER.
3. You can visit the [RakSMS Call to get information page](#), where a list of countries with the corresponding Raketu sms-text numbers are found. To make a RakSMS call you need to find the SMS number listed under your country and your phonenetwork provider. Please check with your phone servicenetwork provider to determine what format is required to send an SMS to the counrty code 01, 44 or 45. They will guide you with the required prefix (if required) that needs to be added before sending this SMS. Currently there are three numbers to send SMS to. However going forward we will provide local SMS numbers to make RakSMS

The company doesn't have the ability to send out sms messages yet but I'm sure in the future you will be able to. However, what they do have is a way to make calls using the sms feature in your phone! A big bonus is that you can get 30mins of free talk time! Download the program and see for yourself!
